HONGKONG, MARCH 17th, 1877.

The Report of the Medical Missionary Society's Hospital in Canton for the past year has just come to hand. The report itself is somewhat meagre, but the results it chronicles are good, and it is, therefore, none the less satisfactory on account of its brevity. An increase is recorded during the year in the numbers both of out-patients and in-patients, the total number treated at the Hospital and Dispensary being 35,822. This is a large number, and shows that the natives have availed themselves pretty freely of the aid and benefit of the institution. Dr. Cannon also states that the attending increase of confidence in Western medical science shown by the people of Kwangtung and the adjoining provinces lately has not been confined to the lower orders but has extended to the highest

rank of the official class. He mentions, in proof of this statement, that during 1876 he has been called to the residence of the Viceroy and several other of the chief officials to attend members of their families or themselves in cases of more or less emergency. From this it is evident that the prejudice so long and persistently shown by the officials is melting away with time, and that there is an increasing probability of the Chinese attempting a reform in their medical system. The class of medical students in the Hospital now numbers eleven, and Dr. Cannon says they are all advancing satisfactorily in the knowledge of medicine and surgery. A museum is being formed in connection with that department of the Hospital, which promises, he says, to be a valuable collection of the results of its operations. Many opium smokers have been cured of the habit during the year, but no particulars of the cases are given. The results attained by this eminently useful and philanthropic mission are altogether very satisfactory. The work is quietly and unobtrusively performed, and the Hospital is rarely heard of save when the annual report is presented, but it is steadily gaining favour among the natives, so many thousands of whom have obtained relief from various complaints by its aid. It cannot be doubted that this unostentatious mission is producing a good effect in many ways upon their minds, and serves to counteract the tales of foreign barbarism which the literati and lower officials are so fond of propagating. The connection it has with the Christian religion ought, moreover, to assist in removing the false impressions too often existing among missionaries and their converts. The patients in the Hospital have the doctrines of Christianity explained to them, and if few of them embrace the faith they at least leave the institution with many false notions removed and with a conviction that there is nothing barbarous or sinister in the teaching of the missionaries. The seed is sown, and though much of it may fall on rocky ground, there is reason to hope that some of it may bear fruit, if not in the conversion of the patients at least in dissipating prejudice and scattering ignorance. That the Medical Missionary Society may go on and prosper in its work is the hope of all foreigners who take an interest in the welfare of the Chinese people.

Two papers last received from Japan contain intelligence of further engagements between the Imperialist troops and the Satsuma rebels, but nothing very decisive seems to have taken place. One thing is very certain, the MIKADO's Government has a much more difficult task before it than any which has hitherto called its energy and resources into play. There is now no doubt of the complete estrangement of General Saio, who has evidently constituted himself the insurgent leader. The *Nichi Nichi Shinbun* asserts that he has hung up a large sign on the gate of his headquarters at Kawajiri bearing an inscription which sets forth that he is president of the new government and commander-in-chief of the army. It infers from this that he has cast off his allegiance to the MIKADO, and is striving for a separation of the island of Kishiu from the rest of the Empire. It has also been said that the Satsuma men go in simply for Home Rule. Whichever story may be correct, it is to be hoped neither project will succeed. Japan is not a large country and to divide it would be to materially weaken the Empire. The Government and the nation will both, there is no doubt, oppose such a movement to the utmost. The open declaration of a separatist policy by Saio and his followers would, in fact, rouse the Imperialists throughout the country to the most determined efforts to subdue them. It is to be feared that the latter are already deeply incensed against the rebels, and some of the native journals denounce Saio as a perfidious traitor, for whom there is no forgiveness. He might, it is thought, have stayed the progress of the insurrectionary movement, and spared this country the miseries of a civil war. But it is possible that he is a mistaken supposition, for at the outset he palpably held aloof from the movement, and may, perhaps, have only joined it when he found his clan were determined to raise the standard of revolt. It is much to be regretted that a man whose career hitherto has been so honourable and useful should now lead himself to a revolt which can only bring disaster on its originators and distress upon the country.

The Hon. Chief Justice sat in Admiralty yesterday to hear a motion for decree and order for sale in the matter of the *Reina*, and owing to an informality in the papers the hearing was adjourned until Monday next. Mr. Justice, General, instructed by Messrs. Sharp, Teller, and Johnson, was for the plaintiffs, Messrs. Adams, Ball & Co., and Mr. King, instructed by Mr. Denby, was for the respondents (the crew) and the captain. The motion was by consent so far as the owners were concerned, but a right was claimed by the captain.

PARTICLES.

The public is reminded that, in China, Legation is no longer, as in England, a place of public and disappointment is one persistent attempts to send them valuable through the Post, Fairs, Curios, Artillery, Dress, Fancy Work, and similar presents come to the attention of the Customs, and are often sent more in postage than would paid the freight by steamer. No refund is made on such parcels of the value of Stamps obliterated before the nature of the contents was discovered.

PATTERNS.

Some difficulty is experienced in obtaining a general understanding of what is a Pattern, and is to send free sample of goods which the sender has no intention of selling, and in the order. It is to consist of the smallest possible quantity, compatible with showing the goods are, and must have no intrinsic value.
